Weather Pack

OHS (Single Wide) / OHD (Double Wide)

Leader in Distributed Systems

We have the broadest distributed refrigeration system product line in the industry, including our Weather Pack. We listen to the needs of our customer and design a system exceeding the customer's expectations. Our Weather Pack systems are built and certified to withstand 90 MPH wind gusts, making this an excellent system for the roof or any other outside location. Collaborative problem-solving is based on our customer's needs, opportunities and desired results. We offer this unit in both double wide (OHD) and single wide (OHS) systems.

Standard Features

- OHS for single wide condensers
- OHD for double wide condensers
- Ideal as a rooftop distributed system reducing pipe runs and refrigerant use
- Lift up door provides shield during installation or service
- Heavy duty steel frame house and aluminum skin
- Integral drain pans

Customized Solutions

- Reciprocating scroll, EVI Scroll, or Copeland Digital Scroll Digital™ Compressors
- Wide variety of controllers (Digital scroll compressors require CPC Einstein II controller)
- Loop piping or individual circuit piping
- Air-cooled condenser available with a variety of fan motor speeds and technologies

Optional Features

- Control panel for case lights, fans, and anti-sweat heaters
- Electric, hot gas, or off-cycle defrost
- Integrated hot water heat exchanger
- Variable speed condenser fan motors
- Heated receiver
- Sound retardant insulation
- Piping through bottom of unit or side

Quality Excellence

- We offer customizations, innovations, and integrated multi-functional technology solutions to positively impact your business
- Commitment to partnerships with customers, vendors and consultants enable us to deliver a value-added product
- Shortest industry lead-times, best on-time delivery, and exceptional performance

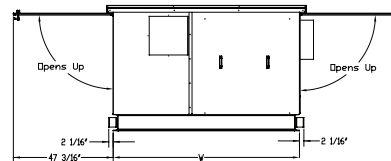

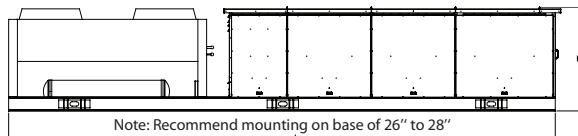

Energy Efficiency

- Technology driven partnerships with energy efficient equipment provide our customer with the best solutions for enhancing profitability
- Refrigeration systems designed for excellent performance and maximum efficiency

Technical Support

- Our professional and qualified Technical Support Team is committed to assisting our customer with individual requirements

Dimension (inches)	OHS	OHD
Width W	50	88
Height H	59-1/16	59-1/16
Length L (add 24 for hot water heat exchanger)	288 (2 Fans)	288 (4 Fans)
	345 (3 Fans)	345 (6 Fans)
	400 (4 Fans)	400 (8 Fans)
